

TITLE: Livelihood Generation Avenues Using Earth-Worm Based Manure: A Study Referencing India

Name: Analjyoti Basu

Affiliation: Associate Professor at Karnavati University

Country: India

Email ID: analjyotione@gmail.com

ABSTRACT

The present-day world focuses more on organic manures to get rid of the illeffects of chemical manures. In this context, Earth-Worm-based organic manure, vermicompost, and vermivash are essential. The earth-worm-based manure replaces chemical manures and favors sustainable development through green practices. However, the present study is riding on the fact that vermi-products have good livelihood and entrepreneurship generating opportunities. The study captures the opportunities in four parts. The first part explored the potential entrepreneurial cum employment-generating opportunities through the works carried by different researchers, while the second captures the reports of different organizations and corporate bodies. The third part focuses on the opportunity analyzed through the author's field work's primary data. Finally, the fourth part tries to bring out all the possibilities of India's potential entrepreneurial cum employment generation possibilities by a modular approach.
